Art Unit: 1794

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14, 18, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Record et al (US Patent No. 5,372,824) for the reasons set forth in rejecting the claims in the last Office action. The new claims are not seen to influence the conclusion of unpatentability previously set forth..

Record et al disclose the combination of flavor and N-ethyl-p-menthane-3-carboxamide in the amounts claimed for use in chewing gums (see entire patent).

The claims differ as to enhancement and the specific flavors.

Record et al also disclose that flavors may be derived from fruits and that flavoring agents may be combined in any acceptable fashion (see column 6, lines 20-33).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use any flavor in that of Record et al because the choice of flavor is seen to be no more than a matter of choice and well-within the skill of the art.

Applicant attaches no criticality to the flavor and discloses fruit, herbal, and spice flavors and specifically states that "(o)ther flavors known to those skilled in the art may also be enhance" (see page 4, second full paragraph). Enhancement would be obvious to that of Record et al as the same components are used. Applicant does not exclude additional components.

Applicant's arguments filed December 29, 2009 have been fully considered but they are not persuasive.

Applicant argues that Record et al requires a mint flavor.

Record et al teach the combination of flavor and N-ethyl-p-menthane-3-carboxamide for use in chewing gums. Applicant does not exclude additional components.

The declaration under 37 CFR 1.132 filed December 29, 2009 is insufficient to overcome the rejection of claims 14, 18, 21, and 22 based upon Record et al (US 5372824) as set forth in the last Office action for the following reasons.

1) Samples 1 and 2 (Table 1) do not contain the WS-3 component. It is not clear how the samples are compared as Samples 1 and 2 do not contain WS-3.

2) The claims do not exclude the presence of mint.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
